VISION  
EXPERTISE  
CORE VALUES

---

# BIO

Timothy M. Bizga, DDS, FAGD is a general dentist practicing in Cleveland, Ohio. His background in dentistry is lengthy and diverse. Once a former chairside assistant, he also worked as a dental lab technician, making his perspective unique among others in the field of dentistry. He received his DDS from the University of Michigan School of Dentistry, where he is also an Adjunct Clinical Assistant Professor. He is currently a member of the American Dental Association and a Fellow in the Academy of General Dentistry. Dr. Bizga is a Certified John Maxwell Speaker/Trainer/Coach, a certified DISC profile trainer, clinical consultant for The Dental Advisor, and Director of Education at Smile Source. Dr. Bizga gives back to the community via dental missions around the world.

---

# EFFECTIVE ASSISTING IN THE MODERN PRACTICE

This dental assisting continuing education course is designed to teach dental assistants and EFDA's the skills necessary to better support their dentists in the everyday routines associated with a general dental practice. A lecture-based program, coupled with everyday practice essentials is the basis of this class. The topics covered will include basic material science, procedural protocols, and topics related to patient care and treatment.

## COURSE OBJECTIVES

- Learn how to achieve employment security in a no-job-security world
- Learn basic material science principles
- Discuss key concepts in restorative procedures
- Review digital and anlog impressing
- Discuss temporary fabrication, material selection, shade selection
- Define importance of patient communication

---

# GET IT, GOT IT, GLUE IT

## A Comprehensive Guide to Terrific Temporization

This course benefits the entire chairside team including Doctors, Assistants & Expanded Function. A comprehensive review of crown and bridge procedures will be discussed and reviewed to offer tips, tricks, and pearls surrounding crown and bridge procedures with special emphasis on temporization.

### **COURSE OBJECTIVES:**

- Learn key techniques and understand the importance of crown/bridge temporization
- Discuss criteria for proper shade selection, material choice, and use of dental cements
- Review cases that demonstrate pearls and pitfalls that bring it all together

---

# POLISH YOUR SKILLS

## How to Extract the Most from Our Everyday Communication to Increase Productivity and Profits

Have you ever presented an idea only to feel like you are pulling teeth to get answers? Maybe you should start thinking as skilled communicators do! Discover strategies used by experts to ensure buy-in and optimize results every time you speak or present...even to the most reluctant of people. In this lively and revealing interactive session, world-class communicator Dr. Tim Bizga will demonstrate why people feel, think and act the way they do. Key insights will show how to discover, experience, and apply human behavioral principles that enhance interpersonal relationships and develop effective workplace partnerships.

### **COURSE OBJECTIVES:**

- Learn current trends in today's general practice and the market we exist in today
- Understand patient psychology and the WHY of patient decision making
- Reinforce the value of great communication
- Gain an understanding of how there is no "one-size fits all" approach to presenting treatment
- Provide an effective method to having clients accept treatment more frequently

---

# EFFICIENT FUNDAMENTAL DENTISTRY

## Pathways to Procedural Mastery in 'Bread and Butter' Dentistry

In today's dental practice, 40% of revenues come from crown and bridge procedures. In addition, a staggering 45% of all billed direct restorative procedures are Class II's! The goal of this course is to teach efficiency while imparting competency in these key areas: the single-unit crown and posterior composite dentistry. By course end, the audience will be able to select appropriate indirect materials and the glues we choose to hold them. Furthermore, attendees will be able to utilize knowledge of the newest direct restorative materials to perform and restore more competently and efficiently. Clinical tips and brand suggestions will be included.

### **COURSE OBJECTIVES:**

- Review principles of tooth preparation
- Learn current methods for tissue management and Impressioning for crowns and bridge
- Review the latest array of indirect material choices
- Learn proper cement selection
- Discuss adhesion and compare/contrast 7 generations of dental adhesives
- Review criteria for properly placed matrix band and wedge and review matrix systems
- Shortcuts and pearls for composites success

---

# PREP N' PRODUCE

## A Comprehensive Guide to Prep Design, Indirect Material Selection, and The Glues We Choose to Use

Crown & Bridge procedures deliver one-third of the annual revenue for the average dental practice, and 80% of those cases are single-unit crowns. This course begins with the principles of proper diagnosis and treatment planning to provide clinicians with a roadmap for when, why, and how to recommend crown and bridge treatment. Building upon that foundation, the course will include tips on prep design and the overall importance of good tooth preparation to ensure a successful outcome. A review of the current concepts of tissue management and impressioning will be discussed, along with a portion of the course dedicated to demystifying the cementation selection process.

### **COURSE OBJECTIVES:**

- Understand when a crown is the most appropriate clinical recommendation vs. a multi-surface direct restoration
- Discuss the importance of proper prep design
- Learn the importance of tray selection and temporization
- Review the latest array of indirect material choices and cementation options

---

# ENDO/RESTO

## Simplifying a Procedural Juggernaut to Achieve Single Visit Profitability

This course is designed to walk dentists and assistants through an entire endodontic appointment from phone call to the final result. The course focuses on the ultimate goal of the single visit Endo/Resto appointment: preservation and extension of the tooth life cycle. Dentists and assistants will not only come away with understanding how to efficiently fill the root, but how to immediately preserve the long-term success of the tooth via current restorative trends and techniques. The goal of this course is simple: reinforce the value of combining Endo/Resto into a single visit appointment thereby preserving teeth, providing exceptional service to the patient, and improving practice profitability.

### **COURSE OBJECTIVES:**

- Diagnose and Treatment plan Endo/Resto procedures
- Discuss minimally invasive techniques for endodontic therapy including access and dentin preservation
- Discuss tips and tricks for reliable, profound anesthesia
- Understand the concepts surrounding when and where to use posts
- Learn the value of single visit Endo/Resto procedures for both patient and profits
- Explain why single visit Endo/Resto is preferred and when it is not an option

---

# DIAMONDS & PEARLS ARE A PRACTICE'S BEST FRIEND

## Treatment Planning and Case Presentation

It's no secret: employees are a company's greatest asset, especially in a dental practice! Therefore, leveraging key patient experience-moments will have huge benefits and in turn, will maximize your practice profits. This course is designed to provide piles of "diamonds" on clinical techniques and treatment planning "pearls" essential to seeing long-term success and financial growth. From understanding patient decision-making to the tools and tips for getting patients to be "WOW-ed" with the overall experience, this course is designed to give a practical, "soup-to-nuts" approach to the latest clinical research, approaches to human behavior and includes special emphasis on team communication.

### **COURSE OBJECTIVES:**

- Learn current trends in today's general practice and the market we exist in today
- Talk common sense, "real-world" approach to treatment planning, and the benefits of "Co-Diagnosis"
- Understand personality styles via the DISC model of human behavior
- Review clinical cases for the application of principles and products

---

# THE NUTS AND BOLTS OF IMPLANT DENTISTRY

This course is designed to focus on restorative implant dentistry, providing informational “gold” on a variety of topics essential to seeing long-term success with implants. From understanding patient decision making, to the tools and select tips for longer lasting dentistry, this course offers a practical “nuts and bolts” approach to restoring implants in your practice. A review of current concepts in tissue management and impressioning will be discussed. By course end, the audience will be able to select appropriate materials and the glues we choose to use to hold them. Furthermore, attendees will be able to utilize knowledge of the newest concepts with implants to perform and restore more competently and efficiently.

## **COURSE OBJECTIVES:**

- Discuss “real world” approach to offering and treatment planning implants in your office
- Review the importance of surgical placement to final restorative outcome
- Discuss occlusion and design for long term implant restorative success
- Gain understanding of when, how and why to use screw-retained vs. cement-retained restorations
- Review clinical cases for the application of principles and products

---

# COMPETITIVE EDGE PROSTHODONTICS

## A Review of “Best-Practice” Techniques for Executing Complex Cases in Your Office

The purpose of this course is to review key concepts and provide clinical pearls for the dental professional who provides esthetic, implant and complex restorative procedures to their patients. By course end, attendees will leave with practical knowledge that you can begin incorporating into your practice the very next day. Case reviews and products will be discussed.

### **COURSE OBJECTIVES:**

- Review prep design (anterior and posterior teeth) for both direct and indirect applications
- Discuss direct and indirect material selection
- Gain understanding of when, how and why to sequence larger case workflows
- Review occlusion principles and smile design concepts

---

# EMBRACE THE CHANGE

## A Thoughtful Discussion on Dentistry in 2020 & Beyond

Dentistry continues to advance, but what key concepts must not be left behind? The purpose of this course is to review key concepts and provide clinical pearls for the dental professional who provides esthetic, implant and complex restorative procedures to their patients. This course also aims to help troubleshoot common challenges faced when executing these procedures. By course end, attendees will leave with practical knowledge that you can begin incorporating into your practice the very next day. Case reviews, restorative updates, and products will be discussed.

### **COURSE OBJECTIVES:**

- Discuss current trends in the industry
- Gain an understanding how a transition to digital workflows can be beneficial to a practice
- Review complex case design pearls
- Discuss direct and indirect material selection
- Review occlusion principles and smile design concepts

---
