# DR. SAM HALABO

Dr. Sam Halabo is an accomplished international speaker, author, and product evaluator. For over 25 years he has run a state-of-the-art private practice in San Diego, CA. He is a graduate of Boston University's Goldman School of Graduate Dentistry and he completed a General Practice Residency at the Loma Linda Veterans Hospital.

Dr. Halabo is an adjunct faculty member at the University of California at San Diego and an Editor for Inside Dentistry magazine. He served as the director of dental care at the UCSD clinic in Pacific Beach, CA. He has been involved in product evaluations for both Clinicians Report (CR) and Catapult Education for many years and is proud and honored to share his knowledge and experience with those seeking to provide excellent dental care for their patients.

Dr. Halabo lectures on a variety of topics with an emphasis on improving patient care and the Dentists' enjoyment of their profession by combining technological and clinical advancements with the use of simple practice management tools.

He is a member of the San Diego County Dental Society, the California Dental Association, the American Dental Association, the Academy of General Dentistry, the Academy of Laser Dentistry, and the American Academy of Cosmetic Dentistry.

Dr. Halabo offers half-day, full-day, and multi-day lectures, including custom courses and hands-on workshops.

## A Fresh Look at Clinical Dental Materials

Modern dentistry is ever-changing with the constant introduction of new materials and techniques. This course will provide a strong foundation for practicing dentists and update their knowledge of current successful materials. The presentations are designed as clinical updates with numerous materials such as composites, adhesives, ceramics, cements, and many others in a step-by-step format. The materials discussed will be shown in third-party studies and clinical situations to provide practitioners with a good understanding of which products and techniques would be most useful in their practice. This fast-paced course is designed to provide information that can be used in the clinic the following day. This presentation has had great reviews and will improve your practice.

### **Learning Objectives:**

- Incorporate appropriate adhesive and cementation protocol, specific and detailed, to the most popular restorative materials, including Zirconia, E-max, and others
- Apply and use direct restoration options for conservative smile restorations
- Simplify tissue management for ideal impressions
- Learn fast and simple temporization techniques
- Increase cosmetic services in your office with unique techniques and ideas
- Understand options for “scanning and milling”
- ...Plus a whole lot more!

**Thanks for making a normally unexciting subject exciting to our attendees! We love that you're an incredibly polished speaker whose humble and approachable at the same time. We plan on bringing you back again to our groups whenever possible.**

# Just Do the Dentistry:

## Achieving Outstanding Results With Direct and Indirect Procedures

Making life simple and predictable is a must in the dental office. Cementation procedures demand time and practice to allow dentists to become proficient enough to provide great patient care. New technologies have emerged that will help close the gap between early materials and the newest generation of products. This course will show evidence-based data, case presentations, and methods of treating various procedures. We will also provide a template for standardizing and simplifying processes to ensure predictability and superb outcomes!

### Learning Objectives:

- Learn practical concepts to enhance your long-term outcomes whether using Zirconia, E-max, or the latest hybrid restorations
- Handle difficult situations such as discolored teeth, subgingival margins, tissue sculpting, isolation problems, and sclerotic dentin
- Eliminate sensitivity and reduce polymerization shrinkage in your composites
- Achieve restorations that are strong, esthetic, and bacteriostatic
- Take home tips and skills that can be utilized right away in your office to make your practice thrive

# **The Recipe for Success:**

## A Complete Guide to an Implant-Centered Practice

This course will engage the practitioner in the many aspects of building an implant practice. Discover the numerous methods of increasing implant treatment in your office. Esthetic restorative materials and techniques will be presented and cases will be discussed from diagnosis to cementation techniques. Marketing methods will also be discussed to help further grow your implant practice.

### **Learning Objectives:**

- Treatment planning, impression techniques & cementation
- Techniques from placement to restoring implants
- Using different implant crown materials
- Implant marketing strategies
- Using cone beam (CBCT) to plan out cases
- Case studies of successes and failures to help guide the practitioner

**Taking the implant class with Dr. Halabo was not only fun but one of the most productive days I've ever had in CE courses. Dr. Halabo believes in making things simple and that's exactly how he teaches his course. He presented everything and incorporated his years of expertise into simplified manner that just resonates with anyone that is trying to learn implants. At the end of the day, I understood the material and felt confident to place my first implant. Dr. Halabo definitely has a way of teaching an intimidating subject such as implants simple!!!**

# Innovations in Composite Technology: Versatile, Simplistic, and Cost Effective

This course will present composite and bonding systems that will help you achieve the goals of speed, esthetics, and productivity. With so many dental restoratives in the marketplace, it has become a task to simply understand and manage the inventory of bonding systems and composite materials. Learn how to work efficiently and cost-effectively while using versatile materials and minimal inventory. Best of all, learn how best to produce great results for you and your patients!

## **Learning Objectives:**

- Produce composite fillings that are esthetic and fast
- Manage the number of materials needed and minimize inventory
- Use materials that rate well and have solid studies backing them
- Get tips on improving the quality, speed, and beauty of your daily procedure
- Use materials that can help make procedures easier and more fun in the office

# Stick It Real Good: Bonding and Cementation With Predictable Materials

Today's fast-paced dental offices require countless number of materials and techniques. These procedures demand time and practice to allow dentists to become proficient enough to provide great patient care. During this course, Dr. Halabo will show evidence-based data, case presentations, and simple methods of treating most cementation procedures. Make your cementation process simple and predictable and enjoy great outcomes in this step-by-step course!

## Learning Objectives:

- Become proficient in deciding which cements to use and when
- Use methods and materials for efficiency and great results
- See presentations of differing protocols for cementing with Zirconia or E-max
- Take-home methods to make cementing simple and less time-consuming
- Get updates on the latest materials in the market

**Dr Halabo's lecture was very informative on the newest bonding and cementing techniques. He gives real world examples of products and cases he has completed. I learned lots of tips and tricks with each of the products he uses. He even shows his failures which most speakers never mention. He is definitely one of the most engaging lecturers I have ever seen.**

# Follow the Yellow Brick Road: A Step-by-Step Approach to Practice Growth

The ever-changing practice of dentistry can be daunting at times. New technologies, products, and many office stresses are constantly introduced, often leaving us wondering how to continue to grow and thrive. This course will explore many of the innovative dental care concepts available today. There will be a focus on the dental practice as a business and the information presented will help identify ideas that will renew the practice and set you apart from your competition. Team member selection and office plans will be discussed. Many motivational concepts will be discussed to help invigorate the practice.

## **Learning Objectives:**

- Establish new goals and visions for your dental practices
- Put together great systems to run the office efficiently
- Use new team-building concepts and bonus plans
- Focus on marketing: internal, external, and online
- Use profitable procedures and materials

# Oh, What a Life...

## The Balanced Practice and Life (How to Enjoy Both)

This course provides knowledge and structure for achieving balance in life and practice. It allows the dentist and team members to come together and enjoy their work rather than struggling to finish each day. The concepts of vision, goal setting, accountability, and many others will be discussed in detail. Ideas, techniques, and products will be presented for profitability and efficiency in the dental practice as well as entertaining and positive concepts for home life.

### Learning Objectives:

- Use daily profitable and enjoyable procedures
- Establish a new vision as both a practitioner and an office
- Set goals: personal and professional
- Institute teamwork and accountability
- Try new ideas and concepts to improve the home life

# The Evolution of Diagnostics and Treatment for Our Aging Population

As patients in each dental practice age, dental clinicians must consider and approach each patient's evolving restorative needs and oral health demands. The life expectancy of our patients has increased by 20 years in almost two generations. This course will cover several real-world case studies demonstrating approaches to treatment planning endosseous implants, improving the esthetics of darker teeth, aiding the retention and stability of removable prosthetics, and improving the overall hygiene and well-being of periodontally compromised dentition within an aging demographic.

## **Learning Objectives:**

- Recognize appropriate patient-based case selection criteria to ensure long-term success for direct, indirect, implant, and removable treatment planning solutions
- Improve all phases of care from pre-operative diagnosis, lab communication, delivery, and follow-up treatment for an aging patient base
- Learn how decades of research can help you save pulps every day
- Apply course concepts and techniques to the current patient population

# SPEAKING ENGAGEMENTS

Dr. Halabo has lectured extensively sharing his knowledge and experience. Some of the events he has lectured at include:

## **AGD**

**Boston University Dental School**

**CDE Baton Rouge**

**CDA South and North**

**Chicago Midwinter Dental Meeting**

**Dental College of Georgia**

**Greater New York Dental Meeting**

**Illinois Academy of General Dentistry**
