

Dr. Ryan M. Walsh

DDS, MS

ENDODONTIST

Lecture Topics

- Anesthesia
- Bioactive Materials
- Endodontic Tips & Tricks
- Hands-On Endo Workshops
- Restorative Endodontics

Dr. Ryan M. Walsh

MEET DR. WALSH

For over a decade, Dr. Ryan M. Walsh has been educating dentists and endodontists to provide the highest level of evidence-based patient-centered endodontic care. Dr. Walsh is a board-certified endodontist and maintains a full-time private practice (limited to endodontics) in Keller, Texas.

As a board-certified endodontist, Dr. Walsh is abreast of the latest techniques in patient and clinical research focusing on bioceramic materials, resorption processes and treatment, irrigation techniques, and tooth cracks and fractures. Dr. Walsh has published multiple peer-reviewed journal articles and has presented to both national and international audiences. When not in private practice, Dr. Walsh maintains a faculty appointment at Texas A&M College of Dentistry in Dallas, TX, where he teaches endodontic residents and dental students the latest advances in endodontics.

Dr. Walsh is a Diplomate of the American Board of Endodontics, a member of the American Association of Endodontists, American Dental Association, and Texas Dental Association. Dr. Walsh is the past president of the DFW Metroplex Endodontic Society and a founding board member of the Seattle Study Club of Fort Worth. Dr. Walsh has been voted "Top Dentist" for the past 10 years in the Fort Worth area.

Course Topics

- All half day seminars can be combined and customized for your groups length of time desired
- May accommodate 90 minute study club
- The endodontic hands-on requires a full day
 - A half day seminar followed by a half-day hands on
 - This allows Dr. Walsh time to help familiarize the participants with the techniques and procedures that will be covered during the hands-on workshop

FROM ACCESS TO
APEX:

Tips and Tricks To Up Your Endo Game:
Endodontics for a Modern Approach

ENDO 911:

Endodontic Emergencies in the GP Office

ANESTHESIA FOR
NUMBIES:

Taking The Pain (& Fear) Out of Anesthesia

WHY IS MY TOOTH
EATING ITSELF?!?!

The Battle With Resorption

THE BIONIC TOOTH

The Latest Bioactive Trends in Endo/Resto

LIGHTS, CAMERA,
IRRIGATION:

Endodontic Irrigation For the General Dentist

KEEPING THE
TOOTH ALIVE:

Vital Pulp Therapy: Pulpotomies, Pulp Caps and More

ENDO HANDS ON

Clean It, Seal It, Fill It:
The "How To" Guide to Clinical Endo

From Access to Apex:

TIPS, TRICKS, AND TECHNIQUES TO MAXIMIZE YOUR ENDODONTIC SUCCESS

HALF DAY OR FULL DAY LECTURE

BRING AN ACCESSED TOOTH AND YOUR LOUPES!

Endodontics is here to stay and we should all be "in the know" of how to provide root canal treatment with the most predictability. Throughout this course, we will discuss endodontics from diagnosis to the final restoration. We will cover tips to get that "hot tooth" numb, how and when to use CBCT, the most effective irrigation techniques, the ideal instrumentation sequence, and the best restorative materials to use once the endo is finished. We will discuss the most up to date endodontic techniques including multi-alloy file systems, bioactive materials and the latest in endodontic irrigation.

THIS COURSE WILL PROVIDE TRAINING IN HOW TO:

1. Assess and diagnose the endodontic patient
2. Provide predictable and successful endodontic anesthesia
3. Determine the most effective techniques to clean, shape and obturate the root canal system
4. Utilize bioactive materials to provide the best apical and coronal restorations

Endo 911

Endo Emergencies for the GP Office

HALF DAY LECTURE

An endodontic emergency can be a stressful event...both for the patient and the clinician! This presentation will explore management tactics including diagnosis, establishing patient comfort and determining both palliative and definitive treatments. The presentation will also review the instrument and equipment needed for various procedures and a review of effective dental anesthesia

THIS COURSE WILL PROVIDE TRAINING IN HOW TO:

- Understand the difference between emergency and urgency
- Competently manage endodontic diagnosis with a patient in pain
- Review treatment protocols for cracked, luxated and avulsed teeth
- Develop an emergency treatment kit to handle every emergency that walks through your door

Anesthesia for Numbies

The 'How To Guide' for the BEST Dental Anesthesia

HALF DAY LECTURE

Effective anesthesia shouldn't be guessing game, it should be your "A" game. Every dentist has had a "Hot Tooth"...the one that couldn't get numb. That tooth is every dentist's - and EVERY PATIENT'S - worst nightmare. Learn how to gain your patient's trust and confidence to perform the best treatment complete and predictable anesthesia. We will discuss the most effective anesthetics with the best techniques to provide profound and repeatable anesthesia for every dental procedure. We will also review which adjuncts work...and which don't. Learn the best techniques to turn that "Hot Tooth" into a sleeping giant.

DURING THIS PROGRAM, PRACTITIONERS WILL LEARN:

- Easy and effective tricks that help take the fear out of anesthesia
- The best anesthetic protocol to use for every type of treatment
- How to utilize adjunctive techniques and instruments to provide profound anesthesia
- Amazing pain management before, during and after dental treatment

Why Is My Tooth Eating Itself?!?!

THE BATTLE WITH RESORPTION

HALF DAY LECTURE

We are diagnosing resorption twice as frequently today as we were 10 years ago, so “Why is my tooth eating itself?”. How do we manage these teeth? Is extraction the only option? In this program, we will discuss the causes and complicating factors that make resorption challenging to diagnose and treat. We review the newest techniques and materials to effectively manage many of these cases.

THIS COURSE WILL PROVIDE TRAINING IN HOW TO:

- Review potential causes and complicating factors involved in resorption
- Identify key radiographic and clinical factors involved with resorption
- Identify distinguishing features of different types of resorption
- Understand which treatment methods work best for each type of resorption
- Can the tooth be saved...or should it be replaced?

The Bionic Tooth

HOW BIO CERAMICS HAVE REVOLUTIONIZED ENDODONTICS

HALF DAY LECTURE

Gone are the days of “drill and fill” and “extention for prevention”. From bioceramic sealers to bioactive composite resins, these products are rapidly becoming the front runners in contemporary dentistry. Learn why bioceramics are becoming the trend in modern dentistry and how to easily incorporate them into your work flow. We will discuss how bioactive materials will maximize your patient care and move your practice to the cutting edge of dentistry.

THIS COURSE WILL PROVIDE TRAINING IN HOW TO:

- Navigate the marketplace to understand the “ins and outs” of bioactive materials
- Utilize bioactive materials both in root canal treatment and tooth restoration
- Employ bioactive materials into daily work flows

Lights, Camera, Irrigation!

ENDODONTIC IRRIGATIONS FOR THE GENERAL DENTIST

HALF DAY LECTURE

With all of the gadgets and widgets on the market, how do you decide what to use for your endo irrigation. We will discuss the best tools techniques and products to predictably and efficiently disinfect your root canals. Dive deep into irrigating solutions with this program and elevate your root canal irrigation strategies.

AFTER THIS COURSE, ATTENDEES WILL LEARN:

1. The pros and cons of dental irrigating solutions
2. Which irrigant solutions can be mixed and which cannot
3. The different types of solution activation
4. Which instruments/techniques provide the best activation
5. To develop an irrigation protocol to maximize canal cleanliness

Keeping the Tooth Alive

VITAL PULP THERAPY: PULPOTOMIES, PULP CAPS AND MORE

HALF DAY LECTURE

Many teeth need root canals...but not every tooth. The advent of bioactive materials has improved our treatment options for keeping the pulp alive. Explore options for vital pulp therapy including pulpotomies, pulp caps and regeneration. We will discuss the techniques and indications for these procedures and what makes them possible. Learn which cases and which materials can improve your success rates and make these procedures a vital part of your practice.

AFTER THIS LECTURE PARTICIPANTS WILL BE ABLE TO:

- Select cases that will produce the most favorable outcome with vital pulp therapy
- Determine which materials are best suited for vital pulp treatments
- Understand the biological implication of maintaining vital pulp
- Select restorative materials for these teeth to provide predictable long-term results

Clean It, Seal It, Fill It

THE "HOW TO" GUIDE TO CLINICAL ENDO

HALF DAY LECTURE AND HALF DAY HANDS ON WORKSHOP

Get your hands on the latest instruments and utilize the newest techniques in this hands-on participation workshop. Utilizing both extracted teeth and plastic tooth models, we will learn techniques for efficient irrigation, the latest rotary instrumentation as well as bioceramic sealer obturation. Take these new skills directly from the workshop back to your everyday practice to modernize your endodontic treatment.

THIS COURSE WILL PROVIDE TRAINING IN:

- How to effectively prepare root canals with the newest 6th generation NiTi instruments
- Why irrigation is important in endodontic treatment and the latest irrigation activation techniques
- Are all endodontic irrigants the same?
- How bioactive materials are important in the Endo-Resto continuum...and which ones to use during treatment
- What important tips and tricks make endodontic procedures profitable and predictable for general dentists
